

Medical Report

Patient Name: John Doe

Age: 45

Date: 2024-03-30

Medical Summary:

The patient has been experiencing fatigue and dizziness for the past two weeks.

Blood tests indicate mild anemia with hemoglobin levels of 10.2 g/dL. Blood pressure is slightly elevated at 140/90 mmHg. Cholesterol levels are within the normal range.

Recommended Tests:

- Complete Blood Count (CBC)
- Electrocardiogram (ECG)
- Kidney Function Test (KFT)

Diagnosis:

- Mild Anemia
- Hypertension (High Blood Pressure)

Prescribed Medications:

- Iron supplements (Ferrous Sulfate 325mg once daily)
- Amlodipine 5mg (for blood pressure control)

Doctor's Notes:

Patient is advised to follow a balanced diet rich in iron and monitor blood pressure

regularly. Follow-up consultation in two weeks.
